AI Phone Concierge — Recommendation

Prepared for 805 LifeGuard leadership · October 14, 2026

Jasper van der Zwaan, Founder & Managing Director · Jasen Juarez, Director of Aquatic Operations · Jaden van der Zwaan, Senior Lifeguard

RECOMMENDATION	LINES	ANNUAL AVERAGE	ONE-TIME
Quo + Sona	Six local numbers	≈ $194 / mo	$19.50

EXECUTIVE SUMMARY

Of the products we checked, **Quo Business** (formerly OpenPhone) is the only one that documents everything we need in one call flow: nested "press 1" menus, business-hours branches, a voicemail box per option, a hand-off to AI, transfer to an outside cell, and a mobile screen showing which number was dialed.

Quo Business — *3 seats, 6 numbers, Sona*

Each of our six local numbers forwards to its own Quo line with its own greeting. Sona handles intake behind a short menu; a person is always one keypress away; the emergency instruction plays first. Forward now, port the numbers in the November–February off-season.

RECOMMENDED · AVERAGE

≈ $194 / mo

$2,332 a year on annual billing.
One-time $19.50 10DLC; porting $0.

OPTION	LOW	MEDIUM	PEAK	WHY IT'S HERE
Quo Business + Sona RECOMMENDED 3 seats · 6 numbers · Sona AI agent	$136	$186	$286	Menus, voicemail boxes and AI in one place; one company handles the audio.
Custom Twilio + Retell RUNNER-UP Twilio menu → Retell agent → Cloudflare Worker to Sheets	≈ $37	≈ $71	≈ $155	Lowest running cost and fits our Twilio and Apps Script tools — but 1–3 weeks of build.
Quo Business, 1 seat BUDGET 1 seat · 6 numbers · Sona; staff reached as outside cells	$100	$150	$250	Same platform, fewer seats; per-person voicemail without seats is unconfirmed.

Monthly figures, annual billing, excluding taxes and regulatory fees. Volume scenarios are planning assumptions, not measured data: 80 calls/mo (Nov–Feb), 200 (shoulder months), 500 (summer peak).

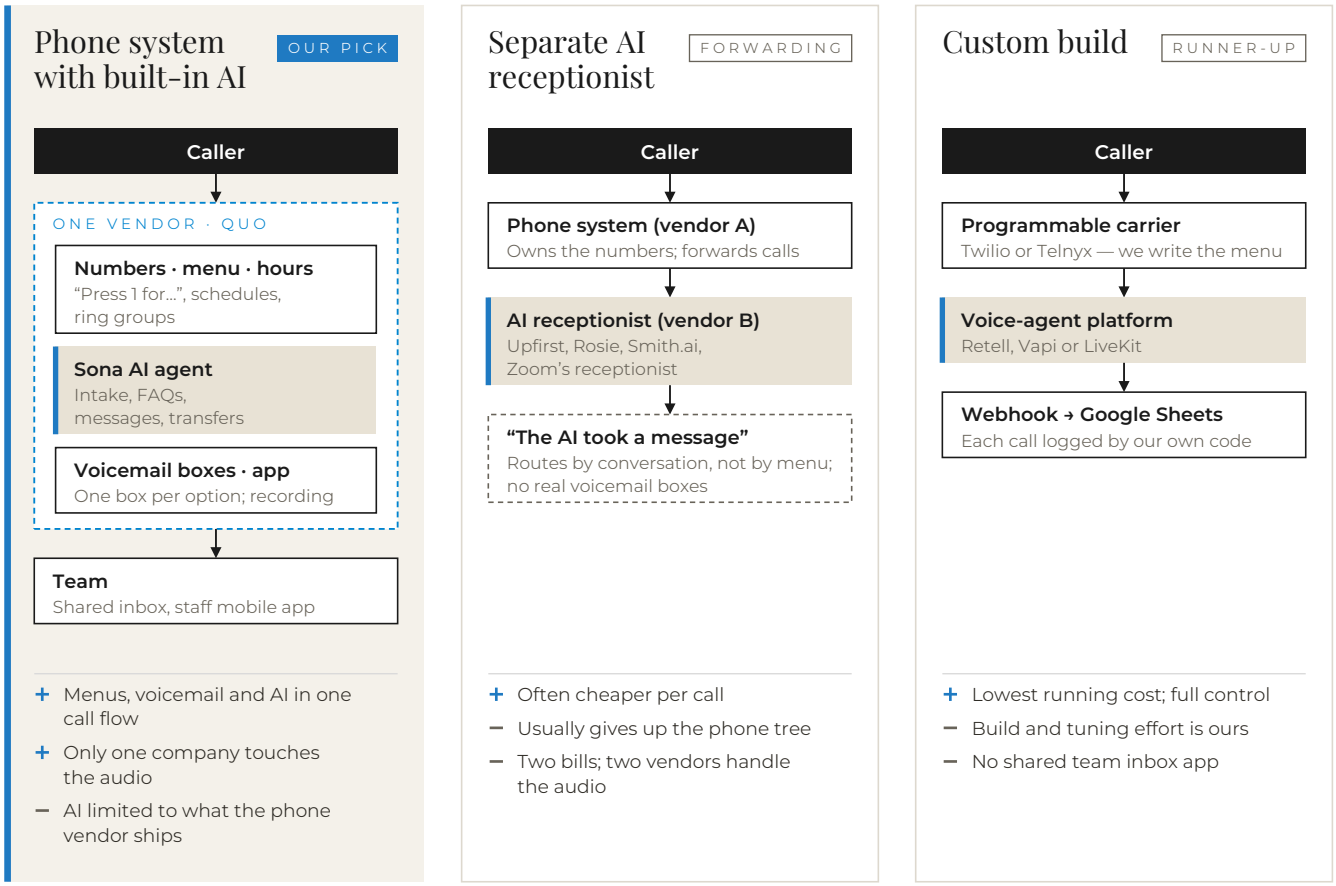

WHY QUO — FIT, NOT PRICE

- Several AI-only receptionists cost less per call, but none we checked documents **separate voicemail boxes per department** or plainly says it can **greet callers differently by forwarded number** — the core of a six-line menu.
- Known trade-offs: Sona leaves the call once it starts a transfer and cannot return; booking is not documented; Capterra reviewers (4.2/5, 64 reviews) report dropped calls and missed notifications. Acceptable for intake lines where a person calls back to close.

HOW IT WORKS

Three layers decide cost, control and legal exposure

An AI phone system has three separable layers. Most buying mistakes come from mixing them up — and the layer that holds the call determines who touches the audio.

THE LEGAL ANGLE OF "WHO HOLDS THE CALL"

A San Francisco court dismissed a CIPA claim against Dialpad because its AI transcription was part of its service as a phone provider. Separately, wiretap claims against standalone AI vendors ConverseNow and Invoca survived early motions to dismiss under the "capability" test — could the vendor use caller data for its own purposes? These are early-stage rulings, not settled law, but they tilt toward an AI agent supplied by the phone provider itself.

WHAT MATTERS AS MUCH AS THE PRODUCT

- **Consent first.** California requires every party's consent to record; CIPA suits now target AI call vendors directly. The recording and AI notice must play before any audio is captured.
- **The contract is part of the consent.** The vendor agreement must forbid using call data for its own purposes.
- **Timing favors us.** Mid-October opens the off-season — the window to build, test and port before summer.

ARCHITECTURE FOR 805 LIFEGUARD

Six local doors, one concierge

Six local identities land in one discreet workflow. Each existing number forwards to its own Quo number and inbox — so each line keeps its own greeting, its own Sona knowledge, and its own emoji on staff phones.

805	**805 LifeGuard** Main line (805) 367-6432	*"Thank you for calling 805 LifeGuard..."* Own Quo number · inbox · Sona · emoji
818	**818 LifeGuard** Existing local number	*"Thank you for calling 818 LifeGuard..."* Own Quo number · inbox · Sona · emoji
310	**310 LifeGuard** Existing local number	*"Thank you for calling 310 LifeGuard..."* Own Quo number · inbox · Sona · emoji
323	**323 LifeGuard** Existing local number	*"Thank you for calling 323 LifeGuard..."* Own Quo number · inbox · Sona · emoji
949	**949 LifeGuard** Existing local number	*"Thank you for calling 949 LifeGuard..."* Own Quo number · inbox · Sona · emoji
858	**858 LifeGuard** Existing local number	*"Thank you for calling 858 LifeGuard..."* Own Quo number · inbox · Sona · emoji

ONE WORKSPACE

The 805 LifeGuard concierge

- **Same menu on every line** — emergency instruction first, then six options and 0 for the team.
- **Staff see which door rang** — the app shows the dialed number plus its emoji.
- **One texting brand** — one 10DLC campaign covering all six numbers, if allowed.
- **Numbers** — 3 included with the seats, 3 extra at $5/mo each.
- **Forward first**; port one number at a time, Nov–Feb.

Why one inbox per line

A caller who dials the 949 number hears "949 LifeGuard," not a generic greeting. Sona answers with that line's knowledge, and the team knows which market is calling before they pick up. RingCentral users, by comparison, have asked for a dialed-number display since 2023 and rely on naming workarounds.

The premium feel comes from restraint

Four to six questions at most. Ask "Would you prefer a text or a call back?" Never repeat an estate address aloud. Never confirm to an unknown caller whether a given person is a client. *Design judgments, not tested benchmarks.*

MENUS DESERVE RESTRAINT — MISSED CALLS COST MORE

61%	**27%**	**69%**	**4–6**
of adults said phone menus hurt the experience	of menu calls abandoned, on average	of 16.7M missed calls got no callback within 48 hours	menu options, AI behind most, a human one keypress away
Vonage survey, 2019 (dated)	*Same survey*	*Quo analysis*	*Design rule adopted here*

MARKET LANDSCAPE

Phone systems: only Quo confirms all four features

We need nested menus, a voicemail box per option, AI configurable per number, and an app that shows which line is ringing. Quo's help pages document all four.

PHONE SYSTEM LAYER

SYSTEM	ANNUAL / MO	MENU TIER	NUMBERS	AI AGENT	NOTES
Quo PICK	Business $23 / $33 Scale $35 / $47	Business+: nested menus, voicemail box per option, AI option	$5/mo; porting free	Sona: 10 calls free, then $25–$199 credit tiers	Vendor page, Oct 14, 2026. The page showed two price sets — confirm at checkout.
RingCentral RingEX	Core $20 / $30 Advanced $25 / $35 Ultra $35 / $45 UNVERIFIED	Multi-level menus listed for older edition names; Core not confirmed	$4.99/mo	AIR $39 add-on (100 min) + $0.50/min	Seat prices third-party, unverified; AIR price from vendor page.
Google Voice	Standard $20 (+ Workspace)	Standard+	Not public	None	Fits the existing Workspace setup, but no AI and no toll-free numbers.
Nextiva	Core $15 (promo)	Auto-attendant on all tiers	Not found	XBert $99 / 100 interactions	Annual term required.
Aircall	$30 (3-license minimum)	Essentials	$6/mo	50 AI min included, then $0.49/min	3-license minimum, so $90+/mo.
Grasshopper	~$14–$80 per account THIRD-PARTY	All plans	$9/mo	AI receptionist announced, no price	Third-party prices.
Zoom Phone	~$10.50–$16 THIRD-PARTY	Metered+	$5/mo	Receptionist $29.99 / 100 min; works with any phone system	Seat prices from a competitor's site; receptionist price from vendor page.

Vendor or third-party list prices checked October 14, 2026, per user per month unless noted (pairs read annual / monthly); Numbers = price per additional number. "Unverified" and "third-party" flag prices we could not confirm on a vendor page. Confirm every price at checkout.

WHAT QUO'S DOCS CONFIRM

- **Nested menus** — a second-level menu can sit under any first-level option.
- **Voicemail per option** — any option can send callers to a specific box.
- **Sona per number** — its own greeting and knowledge on each line.
- **Dialed-number display** — the app shows which Quo number is ringing, plus its emoji.

WHERE QUO IS WEAKER

- Sona leaves the call once it starts a transfer and cannot come back.
- Its help pages do not mention calendar booking.
- Capterra reviewers (4.2/5, 64 reviews) report dropped calls, missed notifications and mobile-app reliability problems.

MARKET LANDSCAPE, CONTINUED

AI receptionists and custom stacks

Forwarding receptionists work, but each sits on top of a separate phone system for menu and voicemail — two bills, two vendors handling the audio. Custom stacks are cheapest per minute but ours to build.

AI AGENT LAYER — FORWARDING RECEPTIONISTS

PRODUCT	MODEL	ENTRY TIERS	DEPT. VOICEMAIL	MULTI-NUMBER
Upfirst	Per call	$59.95 / 90 calls; $159.95 / 300; $0.70–$1.50 per extra call	Not documented	Extra agents $9.95/mo
Smith.ai AI	Per call	$150 / 75 calls; Enterprise $500 adds multi-location	Not documented	Enterprise only
Goodcall	Per unique caller	$79 / 100; $129 / 500; $299 / 2,000	Not documented	Scale pitched for "several locations"
Rosie	Per minute	$49 / 250 min; $149 / 1,000 (transfers start here)	Not documented	Not addressed
Dialzara	Per minute	$99 / 220 min; $199 / 500; $0.35–$0.48 per extra min	Not documented	Not addressed
Ruby / Abby (human + AI)	Per minute	Ruby $395 / 100 min; Abby $329 / 100	Live staff take messages	n/a
Smith.ai human	Per call	$300 / 30 calls; $810 / 90	Live staff take messages	Free porting

Entry tiers from vendor pages, October 14, 2026. Human answering services cost 3–10× more — for us, only a paid peak-season overflow tier. Recent Smith.ai reviews report a prepaid six-month plan not refunded on cancellation. **Ruled out:** Air.ai (FTC action); Synthflow (enterprise only, from $30,000/yr).

CUSTOM BUILD LAYER

PLATFORM	EFFECTIVE $ / MIN	CONCURRENCY / COMPLIANCE	FIT
Telnyx AI Assistant	~$0.061 all-in; numbers $1/mo	HIPAA on every plan, SOC 2 Type II; rounds to 60-second increments	Cheapest bundled option
Retell AI RUNNER-UP	~$0.095–$0.109 own telephony; ~$0.094 with your own SIP trunk	20 concurrent calls free; SOC 2, HIPAA-ready	Best-documented warm transfer with a failure path
Vapi	$0.082–$0.129	HIPAA costs $2,000/mo; a Feb 2026 outage dropped 37,806 calls	Flexible but riskier
Twilio ConversationRelay	$0.07 + $0.0085 inbound + your own AI model	Native keypad (DTMF) detection; you host the WebSocket server	Most control; most work
LiveKit Cloud	~$0.03 + $50/mo plan	BAA only on the $500/mo Scale plan	Cheapest at scale; code-heavy

RECOMMENDED CALL FLOW · EVERY LINE

A short menu, with safety first

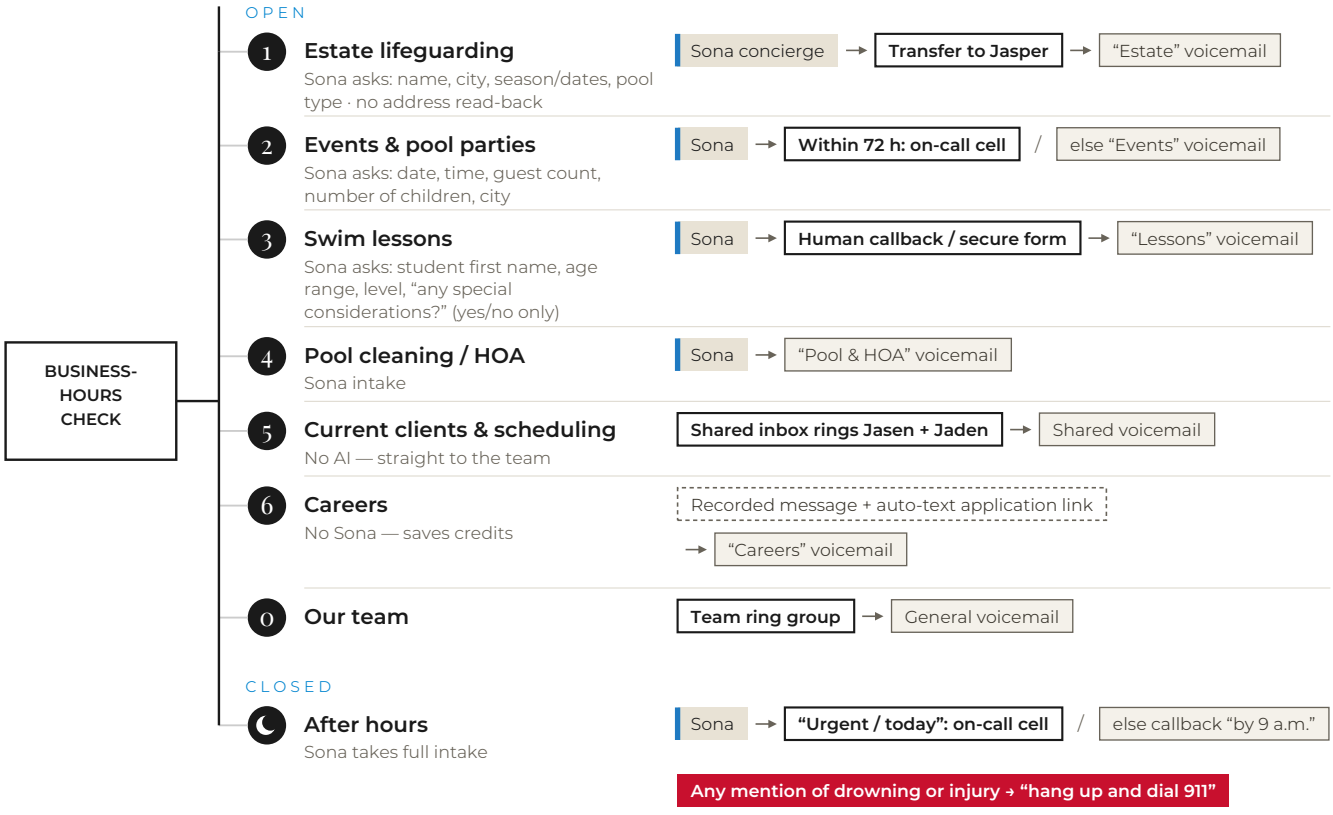

911 — OPENS EVERY CALL · RIGHT AFTER THE LINE'S NAME

"If this is an emergency, hang up and dial 911."

A life-safety call must never be held in an AI flow. Any mention of drowning or injury, at any point, repeats this instruction.

GREETING SCRIPT · COUNSEL TO REVIEW WORDING — [949] = THE DIALED LINE'S OWN NAME

"Thank you for calling [949] LifeGuard. If this is an emergency, hang up and dial 911. Calls are recorded, and you may be assisted by our AI concierge. For private estate lifeguarding, press 1. Event and pool-party lifeguards, press 2. Swim lessons, including special-needs instruction, press 3. Pool cleaning and HOA services, press 4. Current clients and scheduling, press 5. Careers, press 6. Or press 0 for our team."

AI Sona handles · **Person** rings a human · Voicemail dedicated Quo box · Message recorded, no AI

Placeholders, not assignments. Staff roles shown (Jasper on option 1; Jasen + Jaden on option 5; the on-call cell) are placeholders we drafted — leadership to assign actual duties (see Decisions). Per-option Quo voicemail boxes, not a personal cell's voicemail, are the intended fallback for every failed transfer.

PRICE BREAKDOWN · RECOMMENDED

Quo Business by season: about $194 a month

Three seats, six numbers and Sona, on annual billing. Sona is priced conservatively, as if every call reaches it — options 5, 6 and 0 skip it, so real usage should run lower.

THE YEAR AT A GLANCE

LOW · NOV–FEB · 4 MONTHS	SHOULDER · 5 MONTHS	SUMMER PEAK · 3 MONTHS
80 calls · $136/mo	200 calls · $186/mo	500 calls · $286/mo

Bar widths are proportional to months in each season. Call volumes are planning assumptions, not measured data.

MONTHLY LINE ITEMS

LINE ITEM	LOW · 80 CALLS	MEDIUM · 200 CALLS	PEAK · 500 CALLS
Quo Business seats: 3 × $23	$69	$69	$69
Numbers: 3 included with seats + 3 × $5	$15	$15	$15
Sona, assuming every call reaches it	Tier 3 · $49 (100)	Tier 4 · $99 (250)	Tier 5 · $199 (600)
10DLC campaign (one brand, all six numbers)	$3	$3	$3
Monthly total	$136	$186	$286
Same with monthly seat billing (3 × $33 = $99)	*$166*	*$216*	*$316*

Annual $4 \times \$136 + 5 \times \$186 + 3 \times \$286 = \$544 + \$930 + \$858$ **$2,332 / yr** ≈ *$194 / mo*

One-time costs

10DLC texting registration	$19.50
Porting six numbers into Quo	$0
Counsel review of greeting	*Not priced*

Careers option: the summer saving

Applicants who skip Sona (assumed)	150 of 500
Calls reaching Sona	350
Tier 4 + overage: $99 + 100 × $0.55	$154
Instead of Tier 5	$199

All figures monthly, annual billing, excluding taxes and regulatory fees. Unconfirmed: whether Sona tiers can be changed month to month for seasonality, and whether the 10 free calls stack with paid tiers — both on the vendor question list.

PRICE BREAKDOWN · RUNNER-UP

The runner-up: a custom Twilio + Retell build

A custom Twilio + Retell build has the lowest running cost and reuses our planned Twilio account and Apps Script lead pipeline, at the price of build time.

RUNNER-UP · CUSTOM TWILIO + RETELL

Twilio front door + Retell agent + Cloudflare Worker to Sheets. A Twilio number runs the menu, hands calls over SIP to a Retell agent, and a Worker writes each call to Sheets. Assumes **2.5 minutes per call** and **30% of calls transferred for 4 minutes** to a cell.

Per-minute AI cost

Retell infrastructure	$0.055
GPT-5.4 mini	$0.024
Voice	$0.015
Retell subtotal	$0.094
Twilio inbound $0.0085 + SIP $0.004	$0.0125
All-in per AI minute	$0.1065

LINE ITEM	LOW	MEDIUM	PEAK
AI minutes at $0.1065	*200 min* $21.30	*500 min* $53.25	*1,250 min* $133.13
Six Twilio numbers at $1.15	$6.90	$6.90	$6.90
Transfer legs to cells at $0.014/min	*96 min* $1.34	*240 min* $3.36	*600 min* $8.40
Worker (assumption, $0–$5)	$5	$5	$5
10DLC (about $2)	$2	$2	$2
Monthly total	≈ $37	≈ $71	≈ $155

- **One-time:** 10DLC brand registration about $22.50; 1–3 weeks of build and tuning.
- **Gains:** full control over keypad input and recorded voicemail; reuses existing tools.
- Use a Worker, not Apps Script, for in-call tool calls — Apps Script's slow first responses can leave seconds of dead air.
- **Costs:** no shared team inbox app; known Retell bugs where warm transfers fail when the cell's voicemail picks up.
- Build-effort estimates are engineering judgment, not sourced figures.
- Worth revisiting once call volume or integration needs outgrow Quo — a year of call data will tell.

RESPONSE GAP

1.3–1.75 s

Independent tests put real caller-side response gaps at about 1.3–1.75 seconds for **every** platform, against vendor claims of 400–800 ms, and rankings change between benchmarks. Voice quality is no longer the differentiator — prompt tuning and fast tool calls are.

PRICE BREAKDOWN · BUDGET & COMPARISON

The budget option, and all three side by side

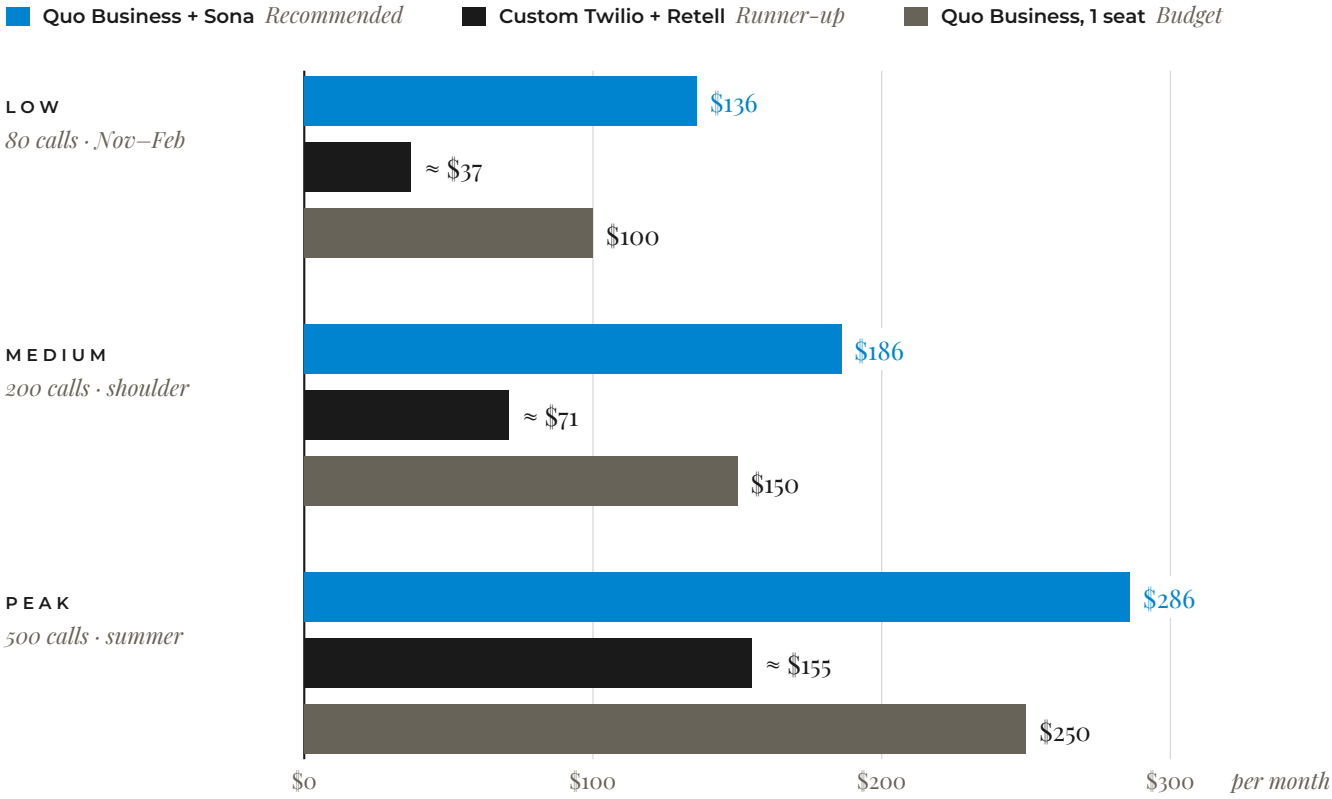

Same platform, fewer seats; per-person voicemail without seats is unconfirmed.

BUDGET OPTION · QUO BUSINESS, 1 SEAT, 6 NUMBERS + SONA

LINE ITEM	LOW · 80 CALLS	MEDIUM · 200 CALLS	PEAK · 500 CALLS
1 seat $23 + 5 extra numbers $25	$48	$48	$48
Sona (same tiers as recommended)	$49	$99	$199
Texting fee	$3	$3	$3
Monthly total	$100	$150	$250

Staff are reached as outside cell numbers. Open question for Quo: do per-person voicemail boxes require a paid seat, or can they be workspace voicemail boxes?

MONTHLY COST BY CALL VOLUME — ALL THREE OPTIONS

Monthly figures from the recommended, runner-up and budget breakdowns: annual billing, excluding taxes and regulatory fees; runner-up figures approximate. One-time costs and build time are not shown.

COMPLIANCE

Consent first — the vendor contract is part of it

INFORMATIONAL This checklist summarizes our review for planning. It is **not legal advice**; counsel should review the greeting, privacy notice and vendor contract before go-live.

☐ **All-party consent to record**	California is an all-party consent state. **Penal Code § 632** covers confidential communications; **§ 632.7** bars recording cell-phone calls without consent whether or not the call is confidential; § 637.2 allows **$5,000 per violation**. Treat every call as covered. A pending bill to curb CIPA suits (SB 690) leaves §§ 631/632 unchanged. → Recording + AI notice is the first audio on every call; re-disclose on conference calls.
☐ **A real opt-out path**	Offer a way not to be recorded — take a message by human callback. Confirm whether Quo can turn off recording and transcription on that branch.
☐ **AI disclosure**	No California law clearly requires disclosing AI on an **inbound** call, and the FCC's proposed rule on AI-generated calls expressly exempts inbound virtual agents. Disclosing upfront is still the cheap, defensible choice. The AI answers "are you AI?" truthfully and never uses a human persona name.
☐ **Vendor data-use terms (DPA)** MUST-HAVE BEFORE GO-LIVE	No model training or product improvement on audio or transcripts; deletion on request; SOC 2. CIPA suits now target AI call vendors directly under the "capability" test — whether the vendor could use caller data for its own purposes.
☐ **Retention**	For example, 90 days for recordings — and state it in the privacy policy.
☐ **Minors' data minimization — swim lessons**	Sona collects only what the call flow lists: student first name, age range and level, plus a yes/no "any special considerations?"
☐ **Special-needs details to a human or secure form**	No special-needs or health details in AI transcripts. Route them to a human callback or a secure form.
☐ **Notice at collection (CCPA pattern)**	Best practice below the $26.625M revenue threshold: one sentence pointing callers to 805lifeguard.com/privacy.
☐ **SMS & 10DLC**	Consent captured on the call; STOP honored; one brand and one campaign covering all six numbers, if allowed. No promotional texts without written consent.
☐ **Outbound AI calls**	Avoid — the TCPA treats AI voice as an artificial voice. Use human callbacks.
☐ **Florida mini-TCPA (FTSA)**	Applies only if we send marketing texts or calls to Florida numbers; if so, counsel review first. Details not verified in our review.

Regulatory picture may still change: no appeals court has decided whether the capability or extension test applies to AI voice agents. Statutory references as summarized in the sources we consulted (Farella Braun + Martel; Epstein Becker Green; Mondaq; Wiley; 11 CCR 7012; CompliancePoint).

ROLLOUT

Forward now, port in the off-season

Forwarding can be undone instantly; porting cannot. Quo says most ports finish in 3–7 business days with no interruption in service. Today, October 14, falls right at the start of our off-season.

Week 1

CONFIRM & BUILD

Confirm the vendor details and build the system

- Get written answers to the open vendor questions, including signing the DPA.
- Open a dedicated 805 LifeGuard Quo workspace so our brand, 10DLC registration and data stay separate.
- Build the menus on new Quo numbers — one per line.
- Submit the 10DLC registration now; approval takes days to weeks.

Week 2

TEST

Test before any live caller reaches the system

Call every line and every option, in and after business hours:

- ☐ Caller's own number comes through on forwarded calls
- ☐ Transfer where the cell's voicemail answers
- ☐ An emergency phrase on every line
- ☐ Addresses are not read back
- ☐ Time until the greeting starts
- ☐ "Are you a human?"
- ☐ The "no recording" option
- ☐ Spanish

Weeks 3–8

FORWARD & MEASURE

Forward the existing numbers and measure

- Forward each existing number to its matching Quo number — conditional (no-answer) forwarding first if possible, then full forwarding.
- Track: calls the AI resolves, transfer rate, hang-ups in the first 15 seconds, and whether callbacks meet the promised time.

Nov–Feb

ONE AT A TIME

Port once the system is stable

- Port between November and February, one number at a time, keeping clear of next summer.
- Ports commonly fail when account details don't match the losing carrier's records or the port-out PIN is missing. Have account number, PIN and a recent bill ready for each line.
- Texting moves separately from voice; A2P registration is separate, and we cancel the old service ourselves.

Before summer

LIVE ON ALL SIX

Peak season on the new system

All six lines ported and tuned ahead of the summer peak. A year of call data then shows whether the custom build is worth the effort.

RISKS & OPEN QUESTIONS

What can still go wrong — and what to ask vendors

The transfer handoff

The biggest product risk. Once Sona starts a transfer it leaves the call. An unanswered transfer to a person goes to that person's voicemail; an unanswered transfer to a shared inbox goes to voicemail regardless of that inbox's own call flow. Test that the intended box catches every failed transfer.

Personal cell voicemail

Forwarding to a personal cell adds its own risk: the cell's voicemail can swallow the call. Per-option Quo voicemail boxes should be the fallback rather than a transfer to the cell.

App reliability

Reviewers report dropped calls, missed notifications and reliability problems with Quo's mobile app.

Regulatory change

No appeals court has decided whether the capability or extension test applies to AI voice agents. Current rulings are early-stage.

QUESTIONS TO PUT TO VENDORS IN WRITING

ASK QUO	ASK RETELL / TWILIO · ALL VENDORS
Will you sign a DPA barring use of audio, transcripts and Sona data for training or product improvement, with set retention and deletion?	**Retell:** the same DPA question.
Can recording and voicemail transcription be turned off on one menu branch (a "no recording" path)?	**Retell:** fixes for the warm-transfer and voicemail-detection bugs; latency of tool calls.
Do per-person voicemail boxes need a paid seat, or can they be workspace voicemail boxes?	**Twilio:** can one 10DLC campaign cover six numbers?
Can Sona tiers change monthly for seasonal volume? Do the 10 free calls stack with paid tiers?	**All:** does the caller's number pass through on calls forwarded from the current carrier?
Does the iPhone incoming-call screen show the inbox **name**, or only the number and emoji?	
Can Sona transfer into a phone menu, and can it book appointments on Google Calendar?	

OWNER TASK — Who is each number's current carrier, and is a port-out PIN in hand? Needed for all six lines — 805, 818, 310, 323, 949 and 858 — before porting begins.

DECISIONS NEEDED FROM LEADERSHIP

Five decisions to move forward

Each item below is open. Nothing has been purchased, assigned or configured.

1 **Approve the vendor**
Quo Business with Sona — 3 seats, 6 numbers; about $194/mo averaged over the year on annual billing. Alternatives on file: the custom Twilio + Retell build (≈ $37–$155/mo plus 1–3 weeks of build) and the 1-seat budget option ($100–$250/mo).

☐ QUO ☐ CUSTOM ☐ BUDGET

2 **Approve the greeting**
Emergency instruction first, recording and AI notice, six options plus 0 — as scripted on the call-flow page, adapted per line ("Thank you for calling [949] LifeGuard…").

☐ APPROVED ☐ REVISE

3 **Assign Jasen and Jaden to options**
Roles in the call flow are placeholders: who takes estate transfers (option 1), the shared current-clients inbox (option 5), and the team ring group (option 0).

ASSIGNED BY

4 **Name the on-call cell for urgent events**
Receives event calls within 72 hours (option 2) and after-hours "urgent / today" calls.

ON-CALL NUMBER

5 **Engage counsel review**
Greeting wording, recording and AI notice, privacy-policy retention statement, and the vendor DPA — before go-live. Not priced in this briefing.

☐ ENGAGED

Also confirm

- Business hours for the open/closed check.
- The callback promise for after-hours calls ("by 9 a.m." as drafted).
- Carrier, account number and port-out PIN for each line.

The bottom line

The choice is decided less by the AI's voice than by who owns the call flow. Starting on Quo now, in the off-season, keeps the custom path open: forwarding costs nothing to reverse.

Leadership review — your decisions, then we build
